Use your floating workspace

Eikon features a floating workspace that displays multiple apps of your choosing. This flexible format means you are not restricted to one size or shape, and can customize screen real estate to suit your needs. With just a few clicks, you can:

- Add the apps you want
- Size them to meet your requirements
- Group them together so that they move as a single entity
- Stack them to create tabbed windows so that you can flip back and forth
- Arrange them around other applications such as Microsoft® Excel® or Outlook®
- Link them together so that they share data

I. Explore apps for your asset class

My Apps gives you one-click access to the apps most frequently used in your asset class. For example, default apps for an equities trader include Quote List, Option Watch, and Time & Sales App.

Click **App Library** to view the full list of available apps.

Other categories help you find the apps suited to your workflow.

Tip: You can rearrange apps in **My Apps** by dragging the icons and dropping them to a new location. You can also add or remove apps by clicking on the + beside the app name.

II. Browse the App Library

Go to App Library within the app menu.

Add apps to your workspace

When you open an app by selecting it in the app menu, the App Library or through the Search box, it automatically becomes part of your active workspace.

This example includes a Monitor, Option Watch, News Monitor and a chart.

Type in **FTSE 100**, click the drop-down triangle to see all constituents.

Group and ungroup the apps.

The active symbol (in this case, Renault <RENA.PA>) is the most recent financial instrument you have focused on. When you add an app, it automatically displays data for the active symbol.

Click an app title bar to move the app. Click and slowly drag an app until its frame touches another app: the two apps group together, and you can move them around as a single entity.

Add News Monitor to your workspace to get:

- The latest market-moving news
- Historical news archives
- Feature-rich, intuitive user interface

Resize an app as you would any other window: just click the frame and drag to the new size.

Use auto-stacking so that new apps open automatically as tabs in the same window. This saves screen real estate.

Within the app, go to > **View > Auto Stack Window** to turn auto-stacking on.

Tip: In the monitor, add any financial instrument. i.e., 10Y Benchmark bond.

For more help, press **F1** when in the app.

3. Now that the apps are linked, click any instrument on the Monitor; all other apps will automatically display content for the new instrument.
